7 JEYAKUMAR VS MENON,
8 Plaintiff,
9 v.
10 MAXEON SOLAR TECHNOLOGIES,
11 LTD., et al.,
12 Defendants.

Case No. 24-cv-03869-EMC

**ORDER GRANTING DEFENDANTS'
MOTION TO DISMISS**

Docket No. 70

13
14 The case at bar is a securities fraud class action. Defendants are (1) the company Maxeon
15 Solar Technologies, Ltd. and (2) two individuals, William Mulligan and Kai Strohbecke, who
16 were, respectively, Maxeon's CEO and CFO during the relevant period.

17 As alleged in the operative amended class action complaint ("CAC"), Maxeon is a solar
18 power energy company. It designs, manufactures, and sells "a comprehensive portfolio of
19 photovoltaic solar panels and related components worldwide." CAC ¶ 42. Plaintiff seeks to
20 represent a class consisting of all those who purchased Maxeon common stock during the period
21 November 15, 2023, through May 29, 2024, inclusive. *See* Mot. at 1. According to Plaintiff, the
22 price of the company's stock dropped significantly after Maxeon made various disclosures on May
23 30, 2024, including the disclosure that, because of serious cash flow challenges, Maxeon had had
24 to get additional capital to support continuing operations and thus had negotiated commitments for
25 significant liquidity support from its largest shareholder, TZE (even though this would result in
26 share dilution and could endanger getting a loan from the federal government for a new
27 manufacturing facility in New Mexico).

1 Now pending before the Court is Defendants' motion to dismiss pursuant to Federal Rule
2 of Civil Procedure 12(b)(6). Having considered the parties' briefs and accompanying
3 submissions, as well as the oral argument of counsel, the Court hereby **GRANTS** Defendants'
4 motion.

5 **I. FACTUAL BACKGROUND**

6 The following allegations are based on the operative CAC and the judicially noticed
7 documents.¹

8 A. Background on Maxeon

9 Maxeon is a solar power energy company. It designs, manufactures, and sells "a
10 comprehensive portfolio of photovoltaic solar panels and related components worldwide." CAC ¶
11 42. Initially, Maxeon was a division of a public company: SunPower. However, in 2020, there
12 was a strategic spinoff which resulted in Maxeon becoming its own separate entity. *See* CAC ¶
13 43.

14 Maxeon's business has two main components: the Distributed Generation ("DG") business
15 and the Utility-Scale business.

16

- 17 • The DG business "provides solar panels and energy solutions for smaller and
18 decentralized power generation applications such as residential, community and
19 commercial applications." CAC ¶ 46. The DG business "has consistently made up
20 the large majority of Maxeon's year-over-year revenue." CAC ¶ 46.
- 21 • The Utility-Scale business "provides support for large solar power plants that
22 produce electricity for the utility grid." CAC ¶ 48.

23

24 ¹ Defendants have asked the Court to take judicial notice of multiple documents. The documents
25 can be grouped into two categories: (1) SEC filings made by Maxeon and (2) transcripts of
Maxeon earnings calls.

26 Plaintiff has raised certain objections to the request for judicial notice. Objections based
27 on relevance are overruled. Even if a document is dated outside of the class period, it can still
28 provide context to the dispute between the parties, including what was the mix of information
known to investors. Objections that documents may not be considered for the truth (but rather
only for what they say) are moot. Defendants are relying on the documents to show what
information was known to investors, and not the truth.

1 B. Maxeon's Relationship with SunPower

2 After Maxeon was spun off from SunPower, the two companies still maintained close ties.
3 *See CAC ¶ 50.* The companies entered into agreements with one another. This included the
4 December 2022 New Master Supply Agreement ("MSA") which was significant for Maxeon's
5 DG business.

6 Under the MSA, Maxeon "agreed to supply its Maxeon 6 Modules to SunPower for use in
7 residential installations in the United States and Canada." CAC ¶ 51. This was an exclusive
8 arrangement – *i.e.*, Maxeon could not sell the modules to anyone other than SunPower for use in
9 the residential market in the United States and Canada, and, in turn, SunPower could not purchase
10 any high efficiency modules from anyone other than Maxeon. *See CAC ¶ 51.* The MSA also
11 included a non-circumvention clause that "prevented the parties from dealing with third[] parties
12 behind the other's back in contravention of the obligations under the agreement." CAC ¶ 51.

13 Maxeon's sales to SunPower "provided a significant source of revenue for Maxeon's DG
14 business" – in fact, constituted as much as 22-27% of the company's *total* revenue. CAC ¶ 52.
15 However, in mid-2023, "the relationship [between the two companies] started to sour." CAC ¶ 53.
16 Maxeon claimed that SunPower was withholding about \$29 million in past due invoices, while
17 SunPower claimed that Maxeon was in breach of the MSA's noncircumvention clause. In July
18 2023, Maxeon stopped shipping its products to SunPower. *See CAC ¶ 53.*

19 C. Maxeon's 2023 Q2 Financial Results

20 In August 2023 – about three months before the start of the class period – Maxeon filed a
21 Form 6-K with the SEC,² providing information about its 2023 Q2 financial results. *See RJN, Ex.*
22 2 (Form 6-K). Attached to the form was (1) a press release and (2) the company's financial
23 results.

24 In the press release, Mr. Mulligan (Maxeon's CEO) stated that the company had
25 "delivered another solid quarter, with year-on-year revenue growth of 46 percent and adjusted

27

28 ² A Form 6-K is a form that foreign private issuers of securities are required to submit, pursuant to certain rules under the Securities Exchange Act of 1934.

1 EBITDA above our guidance mid-point.”” Anders Decl., Ex. 2 (ECF Page 204).

2 However, Mr. Mulligan also cautioned that

3 “[t]he demand environment in the global distributed generation
4 (DG) market weakened significantly in late-Q2 due to the combined
5 effect of higher interest rates, the impact of policy disruption in
6 California, and significant channel inventory industry-wide.^[3] Our
7 DG sales team was able to deliver on-plan ASP and gross profit but
8 came in short of target on volume and revenue. We expect these
9 challenging market conditions to persist at least through Q3,
10 particularly in residential, and we have increased our sales focus on
11 the commercial and industrial (C&I) segment as a result. We
12 therefore expect a somewhat higher mix of C&I sales over the next
13 few quarters with some push-out of volume from Q3 to Q4 and into
14 2024 due to the longer sales cycles associated with C&I projects.

15 In DG, we believe that we are well positioned to navigate the current
16 market dynamics thanks to our differentiated panel technology,
17 direct-to-installer channel model, and geographic diversification,
18 and that our overall portfolio of US utility scale and global DG
19 exposure is a sound strategic platform that provides long term
20 opportunity for profitable growth while diversifying market risk.”

21 Anders Decl., Ex. 2 (ECF Page 204).

22 In its financial results, Maxeon expressly noted that it had an ongoing dispute with
23 SunPower, which was one of its largest customers. *See* Anders Decl., Ex. 2 (ECF Page 223)
24 (noting that, “[d]uring fiscal year 2022, SunPower accounted for 26.7% of our total revenue and
25 9.6% of our accounts receivable as of January 1, 2023,” and, “[d]uring the six months ended July

3 In their complaint, Plaintiff provides more information about these “numerous headwinds . . .
plaguing the solar panel industry.” CAC ¶ 57. In particular:

- 26 • “[T]he Federal Reserve rapidly increased interest rates beginning in 2022 and
27 continuing into 2023, making it more financially burdensome for homeowners to
28 purchase solar panels outright.” CAC ¶ 58.
- There were policy changes that “disincentivized solar panel users from purchasing
solar panels. [For instance,] [i]n April 2023, [the] California Public Utilities
Commission put into effect a rooftop solar rule” under which “solar users who
submitted interconnection applications after April 14, 2023[,] received 75% to 80%
less utility for the extra solar energy they share with the grid. . . . Because solar
shoppers saw less return on their generated solar power, there was inherently less
incentive to purchase solar panels.” CAC ¶ 59.
- In 2023, as well as into 2024, there was “excess production capacity and an
oversupply of Chinese solar products,” which “triggered new lows for prices in the
solar power supply chain.” CAC ¶ 61; *see also* CAC ¶ 62 (alleging that there was a
“significant supply glut worldwide [that] caus[ed] module prices to drop and solar
companies to cancel or suspend their production capacity”).

1 2, 2023, \$151.0 million or 22.7% of our revenue represented sales of solar modules to
2 SunPower”). Maxeon then addressed what impact a loss of the relationship with SunPower would
3 mean. Maxeon stated that,

4 [i]f the parties decide to terminate either SunPower Supply
5 Agreement or not to extend the term of either of these agreements,
6 such termination will negatively impact our revenues in the short
term and may materially impact our results of operations for an
undetermined amount of time as it may take time for us to rebuild
customer demand for such products in the United States.
7

8 Anders Decl., Ex. 2 (ECF Page 224).

9 In spite of the above concerns, Maxeon stated:

10 We believe that our current cash, cash equivalents, along with cash
11 expected to be generated from operations will be sufficient to meet
our obligations over the next 12 months. . . .

12 [However,] [g]iven the dynamic nature of the markets we
13 operate in, the volatility in the capital markets, the current status of
14 our business, rising inflation and interest rates, supply chain
15 challenges, as well as the worldwide uncertainty created by the war
16 in Ukraine, we currently lack the visibility to reasonably quantify
our expected long-term capital requirements and our ability to fully
meet our long-term liquidity needs. Our long-term liquidity needs
would be further negatively impacted if the macro conditions set
forth above last a sustained period of time.

17 Anders Decl., Ex. 2 (ECF Page 225).

18 D. Maxeon’s Preliminary 2023 Q3 Revenue and Shipment Results

19 In October 2023 – about a month before the start of the class period – Maxeon filed
20 another Form 6-K with the SEC, providing information about its preliminary 2023 Q3 revenue and
21 shipment results. *See* Anders Decl., Ex 5 (Form 6-K). Attached to the form was a press release.
22 In the press release, Mr. Mulligan again took note of Maxeon’s dispute with SunPower, its
23 “largest DG customer,” stating that “[w]e do not have visibility into how quickly such resolution
24 [with SunPower] can be achieved.” Anders Decl., Ex. 4 (ECF Page 253).

25 The press release also included the statement that Maxeon “currently expects third quarter
26 2023 revenues to be in the range of \$224 to \$229 million, and shipments to be in the range of 622
27 to 632 megawatts. As a result, the range of our Adjusted EBITDA guidance we provided for the
28 third quarter is expected to shift downward by approximately \$30 million” Anders Decl., Ex.

1 4 (ECF Page 253).

2 However, in spite of the above concerns, Mr. Mulligan still stated: “We believe that
3 Maxeon is well positioned to weather this market disruption and come out stronger on the other
4 side.”” Anders Decl., Ex. 4 (ECF Page 254).

5 E. Maxeon’s 2023 Q3 Financial Results

6 On November 15, 2023 – the first day of the class period – Maxeon filed a Form 6-K with
7 the SEC, providing information about its financial results for 2023 Q3. *See* Anders Decl., Ex. 5
8 (Form 6-K). Attached to the form was (1) a press release and (2) the company’s financial results.

9 In the press release, Mr. Mulligan noted that the third quarter was impacted by the dispute
10 with SunPower. *See* Anders Decl., Ex. 5 (ECF Page 261). But he also announced that the dispute
11 with SunPower was now settled. *See* Anders Decl., Ex. 5 (ECF Pages 261, 282). Under the
12 settlement, the MSA between the companies was terminated effective November 13, 2023;
13 SunPower was required to purchase certain products from Maxeon “on a take or pay basis”;
14 Maxeon and SunPower would be released from reciprocal exclusivity obligations effective March
15 31, 2024; and Maxeon and SunPower would be released from their non-circumvention obligations
16 effective January 1, 2024. CAC ¶ 54.

17 Because of the release from the non-circumvention provision, Mr. Mulligan indicated that
18 the settlement ““ends constraints on Maxeon product sales to SunPower installers at the end of this
19 quarter, clearing the way for Maxeon to aggressively ramp sales into the US market by leveraging
20 its acquisition of Solaria Corporation and accelerated ramp plans for Maxeon 7 capacity.””
21 Anders Decl., Ex. 5 (ECF Page 261) (emphasis added). In other words, Maxeon could work
22 directly with SunPower installers instead of having to use SunPower as a “middleman.” *See* CAC
23 ¶ 4 (“SunPower operated as a middleman, buying the panels from Maxeon and then selling them
24 to dealers and installers.”).

25 In its financial results, Maxeon addressed, *inter alia*, continuing market headwinds⁴ as well

26
27 ⁴ *See, e.g.*, Anders Decl., Ex. 5 (ECF Page 274) (“In the three months ended October 1, 2023, we
28 faced various factors that have affected the demand, including stiff competition and over-supply in
the industry. The impact was prominent in the global DG markets and this trend may continue
into the following quarter.”).

1 as the settlement with SunPower. Regarding the settlement with SunPower, Maxeon noted as
2 follows:

3 Due to the disputes with this significant customer and the
4 termination of the future relationship with SunPower, our revenues
5 have been and will continue to be materially negatively impacted in
6 the short term. Further, our results of operations in the longer term
are expected to be materially impacted until such time as we are able
to rebuild customer demand for our products in the United States, if
at all.

7 Anders Decl., Ex. 5 (ECF Page 283).

8 However, in spite of these challenges, Maxeon noted: **“We believe that our current cash,
9 cash equivalents, along with cash expected to be generated from operations will be sufficient
10 to meet our obligations over the next 12 months.”** Anders Decl., Ex. 5 (ECF Page 286); *see
11 also* Compl. (Chart, **Statement No. 4**).⁵

12 The same day it filed the Form 6-K (*i.e.*, November 15, 2023), Maxeon also held an
13 earnings call. During the call, Mr. Mulligan made statements consistent with the statements
14 above. For example, he stated that the company’s “U.S. utility-scale revenue was up 10% versus
15 the previous quarter,” but, “[i]n our DG business, we faced significant demand challenges caused
16 by the suspension of shipments to SunPower and the effects of a broad market dislocation in
17 Europe.” Anders Decl., Ex. 6 (ECF Page 294). Mr. Mulligan also commented as follows with
18 respect the DG business:

19 Since June of this year, conditions have deteriorated rapidly due to
20 an oversupply of Chinese commodity modules in Europe, and
21 SunPower falling short of their contractual purchase obligations.
22 However, we continue to be bullish regarding the importance of this
sector in the mid- to long term. This view is supported by
increasing global retail electric prices, the integration of battery
storage to create smart and dispatchable systems and the avoidance
of grid congestion as a potential barrier to continued renewable
23 energy penetration.

24 The DG sector is currently experiencing headwinds associated with
25 high interest rates, policy disruptions as well as excess supply and
26 inventory. None of these challenges are unique or unprecedented,
but in combination, they have produced what is a very challenging

27
28 ⁵ In accordance with the Court’s standing order, Plaintiff attached a chart to his complaint,
identifying each of Defendants’ statements that was allegedly false or misleading.

1 industry environment.

2 We are confident, however, that the DG sector will continue to be a
3 vital part of the solar industry in the long run. We remain focused
4 on our DG strategy, mainly developing, manufacturing and selling
5 the world's best solar panels through a differentiated direct-to-
6 installer sales channel with increasing attachment of beyond the
7 panel hardware and software that enables homeowners to control
8 their energy usage.

9 As many of you know, our recent financial performance in DG has
10 been severely hampered by a dispute with SunPower that led us to
11 suspend shipments from July through the end of Q3. I'm pleased to
12 announce that we have reached to a settlement with SunPower
13 earlier this week that enables us to resume shipments.

14 The settlement calls for the parties to transact on 85 megawatts of
15 IBC panels through February 2024 at previously contracted prices
16 and resolved outstanding claims and contract breaches. The parties
17 have also agreed to end other contractual supply obligations by the
18 end of this quarter, including purchase obligations by SunPower
19 beyond the 85 megawatts and constraints on Maxeon product sales
20 to SunPower installers.

21 Offering panels directly to installers will eliminate the markup
22 SunPower has historically added to our products, allowing us to
23 deliver the world's best panels to customers at more competitive
24 pricing. **This will enable our plans to aggressively ramp our**
25 **sales in the U.S. market.** Leveraging our recent Solaria
acquisition, which nearly doubled the number of dealers actively
buying our product to over 170.

17 Anders Decl., Ex. 6 (ECF Page 295) (emphasis added); *see also* Compl. (Chart, **Statement No. 1**).

18 Mr. Mulligan further noted as follows with respect to sales to SunPower dealers:

19 I want to just clarify that we're actually free to approach SunPower
20 dealers starting January 1. We have exclusivity on the Maxeon 6
21 product through the end of Q1, but we are able to sell Maxeon 3 and
22 Maxeon 7 starting the first of the year. **It is a little early to see how**
23 **that's going.**

24 **We've obviously been very careful not to approach SunPower**
25 **dealers while the contract is still in place. And that remains to**
be the case for a number of dealers, not all of the dealers, but a
number of the dealers through the end of the year. We're just 6
weeks away or so, 3 of those weeks are holiday weeks. So January
1 is going to be here very quickly, and we'll engage quickly at that
point in time.

26 Anders Decl., Ex. 6 (ECF Page 305) (emphasis added); *see also* Compl. (Chart, **Statement No. 2**).

27 Finally, during the earnings call, Mr. Strohbecke (Maxeon's CEO) made the following
28 comment regarding the company's cash levels: **"Cash levels were . . . impacted by lower**

1 shipments and margin dollars from our global DG business, **the reduction of contract liabilities**
2 **related to our U.S. utility-scale business capital expenditures during the quarter,**
3 restructuring expenses and a reduction in short-term debt.” Anders Decl., Ex. 6 (ECF Page 297)
4 (emphasis added); *see also* Compl. (Chart, **Statement No. 3**); Anders Decl., Ex. 5 (ECF Page 286)
5 (“We have collected material customer advances in connection with certain of our supply
6 agreements we have entered into. The customer advances are amortized based on the
7 contractually agreed upon utilization schedule at the point of transfer of control of goods to the
8 customer. As of October 1, 2023, the customer advances included within ‘Contract liabilities,
9 current portion’ and ‘Contract liabilities, net of current portion’ in our Condensed Consolidated
10 Balance Sheets is \$204.2 million and \$120.4 million, respectively.”).

11 F. Maxeon’s Preliminary 2023 Q4 and FY 2023 Financial Results

12 On April 8, 2024, Maxeon filed another Form 6-K with the SEC, this time announcing its
13 preliminary financial results for 2023 Q4 and FY 2023. *See* Anders Decl., Ex. 7 (Form 6-K).
14 Attached to the form was a press release. In the press release, Mr. Mulligan stated that, “[i]n the
15 fourth quarter [of 2023], **Maxeon delivered financial results largely in line with our**
16 **expectations**. Our U.S. utility-scale business accounted for the majority of revenues in the fourth
17 quarter, with stable ASPs.” Anders Decl., Ex. 7 (ECF Page 316) (emphasis added); *see also*
18 Compl. (Chart, **Statement No. 5**).

19 Mr. Mulligan also made the following comment:

20 “The Maxeon team is highly focused on reducing manufacturing
21 costs, OPEX rationalization and **liquidity management to enable a**
22 **return to profitability**. Our strategy continues to be to focus on
23 designing and building premium, differentiated products and
delivering a superior customer experience across a balanced
portfolio of global DG **and U.S. utility scale markets**. The
Company plans to file its annual 20-F report by April 30, 2024.”

24 Anders Decl., Ex. 7 (ECF Page 316) (emphasis added); *see also* Compl. (Chart, **Statement No. 6**).

25 G. Maxeon’s Notice of Late Filing for FY 2023

26 On April 30, 2024, Maxeon filed a Form 12b-25 with the SEC, notifying the agency that it
27 would be late in filing its annual report for FY 2023. *See* Anders Decl., Ex. 8 (Form 12b-25). It
28 stated:

The Company is unable to file the Annual Report within by the prescribed time period without unreasonable effort or expense because the Company needs additional time to complete its financial statement preparation and review process. As a result of the foregoing, the Company has not yet completed its year-end reporting procedures required and consequently its independent registered public accounting firm has not yet completed its audit procedures. Factors which have affected the timing of the preparation and review of the financial statements include the additional **ongoing work required in connection with the assessment of the Company's ability to continue as a going concern, including the ongoing analysis of the Company's strategic options** with the assistance of external advisors.

Anders Decl., Ex. 8 (ECF Page 327) (emphasis added); *see also* Compl. (Chart, **Statement No. 7**).

H. Maxeon's 2024 Q1 Financial Results

According to Plaintiff, the truth about “[1] Maxeon’s struggles in the DG business and [2] its cash flow and liquidity crisis was revealed to the market on May 30, 2024.” CAC ¶ 75.

On that day, an earnings call took place for 2024 Q1. Mr. Mulligan announced during the call that Maxeon ““has been facing a serious cash flow challenge[,]” with total operating cash flow for the fourth quarter of 2023 at negative \$76 million followed by a negative operating cash flow of \$73 million during the first quarter of 2024.” CAC ¶ 77. Mr. Mulligan “acknowledged the negative impact market conditions had on Maxeon’s liquidity position.” CAC ¶ 78; *see also* CAC ¶ 85 (referring to ““overall demand softness”” and a ““general market slowdown””); CAC ¶ 100 (referring to market ““headwinds””).

Furthermore, during the call, Maxeon noted the loss of two of its largest Utility-Scale customers, *see* CAC ¶ 100; the amortization of the Utility-Scale prepayments, *see* CAC ¶ 102; and the

decrease in its DG sector revenue by \$39 million, representing historic lows for the Company. This was a dramatic decline in revenue from [Maxeon's] previous quarter, representing a 30.23% drop in its DG business revenue and a 22.02% drop in overall revenue from the previous fiscal quarters, and a 41% year-over-year decline.

CAC ¶ 84.

On the same day as the earnings call, Maxeon filed a Form 6-K with the SEC, providing its financial results for 2024 Q1. *See* Anders Decl., Ex. 9 (Form 6-K). Attached to the form was (1)

1 a press release and (2) the company's financial results.

2 In the press release, Mr. Mulligan stated as follows:

3 "Maxeon has been facing a very difficult market environment since
4 the third quarter of last year, with challenging industry pricing
5 conditions and demand disruptions in our DG business due to higher
6 interest rates and policy changes, as well as project pushouts by two
7 of our large-scale customers in the US. These external factors led to
8 underutilized manufacturing operations, increased product costs, and
9 lower revenue and profit than planned. While the Company is
10 making progress on our announced restructuring initiatives and we
are seeing some positive trends in the market, we determined that
Maxeon requires additional capital to support its continuing
operations. After conducting a thorough analysis with the help of
financial advisors, management and the board determined that the
most viable financing option to support our immediate liquidity
needs was from our largest shareholder, TCL Zhonghuan Renewable
Energy Technology Co. Ltd. (TZE)."

11 Anders Decl., Ex. 9 (ECF Page 335). Maxeon went with this option even though (1) it would
12 result in shareholder dilution and (2) it might endanger getting a loan from the federal government
13 for a new manufacturing facility in New Mexico (since TZE was a foreign investor). *See CAC ¶¶*
14 82-83.

15 In its financial results, Maxeon made a number of disclosures, including but not limited to,
16 the following:

17 • It was not clear whether Maxeon could continue as a going concern: "We face
18 uncertainty regarding the adequacy of our liquidity and capital resources and have
19 extremely limited, if any, access to additional financing. In addition to the cash
20 necessary to fund ongoing operations, we have incurred significant professional
21 fees and other costs in connection with the Debt Restructuring Transactions and
22 expect to continue to incur significant professional fees and costs through the
23 consummation of the Debt Restructuring Transactions. We cannot guarantee that
24 cash on hand and cash flow from operations will be sufficient to continue to fund
25 our operations and allow us to satisfy obligations until we are able to consummate
26 the Debt Restructuring Transactions." Anders Decl., Ex. 9 (ECF Page 354); *see also*
27 Anders Decl., Ex. 9 (ECF Page 356) (noting that "the worldwide solar industry
28 has suffered and continues to suffer from oversupply and intense competition, as

1 well as lower demand in our key markets driven by regulatory changes and a higher
2 global interest-rate environment”; “[i]f the current market condition persist and the
3 Company is not successful in raising capital, the Company will not have sufficient
4 liquidity to meet its financial obligation as and when they come due, and may be
5 required to delay, limit, and/or reduce its operational activities,” and, thus, “there is
6 substantial doubt about the Company's ability to continue as a going concern”).

7 • Part of Maxeon's liquidity problem was due to the amortization of Utility-Scale
8 prepayments.⁶ According to Plaintiff, Maxeon would “reach the peak of its utility-
9 scale prepayment amortization schedule in or before the first quarter of 2024.”
10 CAC ¶ 68. “Reaching the peak of this schedule meant that no cash would be
11 coming in – i.e., all the prepayments had been paid.” CAC ¶ 68. Maxeon stated as
12 follows in its financial results: “Our primary sources of liquidity are cash generated
13 from operations, customer advances in connection with certain of our supply
14 agreements, financing obtained through equity issuance and convertible debt
15 issuances. Refer to ‘Note 5. Revenue from contracts with customers’ to our
16 consolidated financial statements disclosure in our Annual Report on Form 20-F for
17 the fiscal year ended December 31, 2023 for more details on the amortization of the
18 customer advances. As of December 31, 2023, our total current liabilities exceeded
19 our current assets by \$190.1 million. We received a going concern opinion by our
20

21 ⁶ In the CAC, Plaintiff explains prepayment amortization as follows:
22

23 Prepayment amortization is an accounting process that recognizes
24 the expense of an asset – [here,] the solar panels to be shipped – that
25 was paid for in advance over the specific period of time in which the
prepayment is used. Prepayments must be amortized to avoid
overstating revenue during the period the prepayment is received
because the expense associated with the transaction can be realized
in the period that the performance is completed.

26 CAC ¶ 68. In other words, when a customer pays for goods before they are delivered, *i.e.*, makes
27 a prepayment, that creates a contract liability for the seller because it still has to deliver the goods.
As the seller fulfills the contract and delivers the goods, the contract liability is amortized,
28 becoming revenue and the contract liability is reduced.

1 auditors because there is substantial doubt about our ability to continue as a going
2 concern. The Company has also pledged certain equipment assets and inventory to
3 serve as collateral for some of these advances from customers.” Anders Decl., Ex.
4 9 (ECF Page 355).

5 • Several of Maxeon’s large customers had “cancelled or deferred their off-take
6 commitments, which further contribut[ed] to the deterioration of the Company’s
7 financial condition.” Anders Decl., Ex. 9 (ECF Pages 355-56); *see also* CAC ¶ 69
8 (alleging that “two of [Maxeon’s] large Utility-Scale customers . . . were
9 experiencing project delays and thus told Maxeon that they ‘would not be in a
10 position to accept [module] deliveries under’ [the] agreed upon contract with
11 Maxeon[;] [t]his left Maxeon without the expected cash from these deals and
12 unused inventory, the costs of which they were forced to absorb”); Anders Decl.,
13 Ex. 9 (ECF Page 351) (discussing termination of an agreement with one of the
14 Utility-Scale customers, Origis, because Origis failed to purchase any modules as
15 required under the parties’ contract).

16 Based on, *inter alia*, the above disclosures on May 30, 2024, Maxeon’s common stock
17 price fell – “from a close of \$3.11 on May 29, 2024 to \$2.03 on May 30, 2024, and closed at \$1.88
18 on May 31, 2024, representing a cumulative [] drop of 39.55%.” CAC ¶ 86.

19 I. Alleged Misrepresentations

20 The above forms the backdrop for Plaintiff’s claim that Defendants made
21 misrepresentations for which they can be held liable under federal securities law. As noted above,
22 the alleged class period runs from November 15, 2023, through May 29, 2024, inclusive. *See*
23 Mot. at 1. According to Plaintiff, Defendants made seven different misrepresentations which took
24 place in November 2023 and April 2024. The seven alleged misrepresentations (all identified
25 above) can be essentially be put into one of two categories:

26 (1) Defendants misrepresented that, “without SunPower, Maxeon could successfully
27 implement a direct[-]to[-]dealer sales strategy [when,] [i]n truth, . . . Maxeon knew
28 that its ability to ramp up sales without SunPower was extremely limited because

3 (2) Defendants misrepresented its profitability, cash flow, and/or liquidity – e.g., by
4 not disclosing that no more cash would be coming in from the Utility-Scale
5 prepayments, *see Opp'n at 9*; by not disclosing that, “as early as summer 2023 and
6 as late as September 2023,” lenders had expressed concern about Maxeon’s ability
7 to continue as a going concern, *Opp'n at 10*; and by not disclosing that two major
8 Utility-Scale customers were experiencing project delays. *See Opp'n at 11-12.*

9 Plaintiffs' narrative is essentially as follows:

10 [U]pon the heels of losing its largest customer [SunPower] and in
11 the face of significant capital and liquidity restraints, Defendants
12 artificially inflated the stock price by touting implausible growth
13 strategies they knew had already failed and were likely to be very
14 difficult to implement [*i.e.*, selling product to SunPower installers
directly;] made statements about Maxeon's present cash flow,
liquidity and financial results they knew were false or misleading[;]
and made statements concerning the Company's future ability to
meet its capital requirements they knew were objectively
unattainable.

16 || Opp'n at 14.

17 Based on this narrative and, *inter alia*, the above allegations, Plaintiff has asserted two
18 causes of action:

19 (1) Violations of § 10(b) of the Securities Exchange Act and Rule 10b-5 (against all
20 Defendants).

21 (2) Violations of § 20(a) of the Securities Exchange Act (against Mr. Mulligan and Mr.
22 Strohbecke only, *i.e.*, the individual defendants).

II. **DISCUSSION**

24 || A. Legal Standard

Under Federal Rule of Civil Procedure 12(b)(6), a defendant may move to dismiss a cause of action for failure to state a claim for relief. To overcome a Rule 12(b)(6) motion after the Supreme Court’s decisions in *Ashcroft v. Iqbal*, 556 U.S. 662 (2009), and *Bell Atlantic Corp. v. Twombly*, 550 U.S. 544 (2007), a plaintiff’s “factual allegations [in the complaint] ‘must . . .

1 suggest that the claim has at least a plausible chance of success.”” *Levitt v. Yelp! Inc.*, 765 F.3d
2 1123, 1135 (9th Cir. 2014). The court “accept[s] factual allegations in the complaint as true and
3 construe[s] the pleadings in the light most favorable to the nonmoving party.” *Manzarek v. St.*
4 *Paul Fire & Marine Ins. Co.*, 519 F.3d 1025, 1031 (9th Cir. 2008). But “allegations in a
5 complaint . . . may not simply recite the elements of a cause of action [and] must contain sufficient
6 allegations of underlying facts to give fair notice and to enable the opposing party to defend itself
7 effectively.” *Levitt*, 765 F.3d at 1135 (internal quotation marks omitted). “A claim has facial
8 plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable
9 inference that the defendant is liable for the misconduct alleged.” *Iqbal*, 556 U.S. at 678. “The
10 plausibility standard is not akin to a probability requirement, but it asks for more than a sheer
11 possibility that a defendant has acted unlawfully.” *Id.* (internal quotation marks omitted).

12 Because Plaintiff is asserting that Defendants engaged in fraud, Federal Rule of Civil
13 Procedure 9(b) is also implicated. Rule 9(b) provides that, “[i]n alleging fraud or mistake, a party
14 must state with particularity the circumstances constituting fraud or mistake. Malice, intent,
15 knowledge, and other conditions of a person’s mind may be alleged generally.” Fed. R. Civ. P.
16 9(b).

17 Finally, since Plaintiff is claiming securities fraud specifically, the Private Securities
18 Litigation Reform Act (“PSLRA”) imposes additional requirements.

19 Under the PSLRA, “the complaint shall specify each statement
20 alleged to have been misleading, the reason or reasons why the
21 statement is misleading, and, if an allegation regarding the statement
22 or omission is made on information and belief, the complaint shall
23 state with particularity all facts on which that belief is formed.” 15
U.S.C. § 78u-4(b)(1). Importantly for purposes here, the complaint
must also “state with particularity facts giving rise to a strong
inference that the defendant acted with the required state of mind.”
Id. § 78u-4(b)(2)(A).

24 The PSLRA’s “strong inference” requirement has teeth. It is an
25 “exacting” pleading obligation, *Zucco Partners*, 552 F.3d at 990,
26 that “present[s] no small hurdle for the securities fraud plaintiff.”
Schueneman, 840 F.3d at 705 (quotations omitted). As the Supreme
Court has explained, “[t]he strong inference standard unequivocally
raised the bar for pleading scienter.” *Tellabs*, 551 U.S. at 321
(quotations omitted) (alteration adopted). Given the substantial
costs that securities fraud litigation can impose, the “strong
inference” standard reflects Congress’s attempt to halt early on

1 securities litigation that lacks merit or is even abusive, while
2 allowing plaintiffs with potentially winning claims to proceed to
3 discovery. *See id.* at 323-24.

4 Acknowledging these interests, the Supreme Court has held that
5 under the PSLRA's "strong inference" standard, a complaint will
6 survive a motion to dismiss "only if a reasonable person would deem
7 the inference of scienter cogent and at least as compelling as any
8 opposing inference one could draw from the facts alleged." *Id.* at
9 324.

10 *Nguyen v. Endologix, Inc.*, 962 F.3d 405, 414 (9th Cir. 2020).

11 B. False or Misleading Statements

12 Defendants argue first that Plaintiffs' securities fraud claims are deficient because Plaintiff
13 has failed to adequately allege that any of the statements at issue were false or misleading. For
14 each of the statements, Defendants make one or more of the following arguments: (1) the
15 statement was forward looking in nature and is protected by the safe harbor provision in the
16 PSLRA; (2) the statement was simply one of corporate optimism (puffery) and thus is not
17 actionable; (3) the statement is an inactionable statement of opinion; and (4) Plaintiff has not
18 sufficiently alleged that the statement was false or misleading.

19 1. Statement No. 1

20 Statement No. 1 was made during the earnings call on November 15, 2023 (the first day of
21 the class period):

22

- 23 • "Offering panels directly to installers will eliminate the markup SunPower has
24 historically added to our products, allowing us to deliver the world's best panels to
25 customers at more competitive pricing. **This will enable our plans to
26 aggressively ramp our sales in the U.S. market.**" CAC ¶ 88 (emphasis in
27 original).

28 CAC ¶ 88 (emphasis added). According to Plaintiff, the statement was false or misleading
because it "gave investors the materially false and misleading impression that without SunPower,
Maxeon could successfully implement a direct[-]to[-]dealer sales strategy" when, "[i]n truth, . . .
Maxeon knew that its ability to ramp up sales without SunPower was extremely limited because
its prior attempts to contact dealers directly had already led to a loss of business." Opp'n at 7.

Defendants argue that any securities fraud claim based on Statement No. 1 should be

1 dismissed for the following reasons: (1) the statement was forward looking in nature and is
2 protected by the safe harbor provision in the PSLRA; (2) the statement is a nonactionable
3 statement of corporate optimism; and (3) there are insufficient allegations that the statement was
4 false or misleading.

5 For purposes of this order, the Court focuses on the third argument as it is dispositive. As
6 noted above, according to Plaintiff, Statement No. 1 was false or misleading because, at the time it
7 was made, Maxeon already knew it was not succeeding in making sales to SunPower dealers (*i.e.*,
8 even before the non-circumvention provision in the MSA was to expire), and thus it was false to
9 suggest that it could aggressively ramp up sales to the installers once the non-circumvention
10 provision was no longer in effect. In support, Plaintiff cites testimony from two confidential
11 witnesses (“CWs”). *See* Mot. at 12-13.

12 “[A] confidential witness[] whose statements are introduced . . . must be described with
13 sufficient particularity to establish their reliability and personal knowledge.” *Zucco Partners, LLC*
14 v. *Digimarc Corp.*, 552 F.3d 981, 995 (9th Cir. 2009). The question is “whether a complaint has
15 provided sufficient detail about a confidential witness' position within the defendant company to
16 provide a basis for attributing the facts reported by that witness to the witness' personal
17 knowledge.” *Id.* In other words, there must be ““sufficient particularity to support the probability
18 that a person in the position occupied by the source would possess the information alleged.”” *Id.*
19 Factors that may be considered in assessing such include the following: “the level of detail
20 provided by the confidential sources, the corroborative nature of the other facts alleged (including
21 from other sources), the coherence and plausibility of the allegations, the number of sources, the
22 reliability of the sources, and similar indicia.” *Id.* at 996 (internal quotation marks omitted).

23 CW-1 was a Senior Manager of Project Finance at Maxeon from December 2022 to
24 January 2024. They were “a member of the Company's Treasury Team and had direct dealings
25 with Mulligan, Strohbecke, and Babcock [the Chief Revenue Officer and interim CEO]. . . .
26 Strohbecke was included ‘on all correspondences’ regarding the various matters CW-1 worked
27 on.” CAC ¶ 40. In their position, “CW-1 had considerable visibility [into] the Company's
28 finances,” spending “their career reading financial statements. CW-1 was also involved in credit

1 underwriting and raising capital through debt and equity for ‘infrastructure projects.’” CAC ¶ 40.

2 According to CW-1,

3 SunPower’s dealers had been cultivated and developed by
4 SunPower over a long period of time and, generally, they had had
5 positive experiences with SunPower. While the dealers knew
6 generally that Maxeon made the panels that SunPower sold, the
7 dealers were confused when they started getting calls from Maxeon
8 representatives. Maxeon’s direct contact “caused a lot of confusion
9 with dealers” who were now getting calls from Maxeon
representatives when they were used to dealing with SunPower,
exclusively. Such an approach may have been considered an
“underhanded” move by Maxeon and led to “a great deal of loss” of
such dealers. CW-1 reported that those Maxeon personnel actually
dealing with the dealers said they were clearly “pretty pissed.”

10 CAC ¶ 66.

11 It is not clear that CW-1 was in a position to possess information about SunPower dealers.
12 Indeed, there is no indication that they were involved in sales at all. CW-1’s information appears
13 to have been gleaned from “Maxeon personnel” who did deal with SunPower installers, but it is
14 not clear why CW-1 would have a reason to interact with such personnel as part of their *own* job
15 and/or how CW-1 would have a basis for relying on what was being reported; thus, there is a
16 reliability concern. *See Gammel v. Hewlett-Packard Co.*, 905 F. Supp. 2d 1052, 1073 (C.D. Cal.
17 2012) (stating that, “while reliance on hearsay does not automatically render confidential witness
18 statements unreliable, such reliance may indicate that particular statements are ‘not sufficiently
19 reliable, plausible, or coherent to warrant . . . consideration’”); *see also In re Plantronics, Inc. Sec.*
20 *Litig.*, No. 19-cv-07481-JST, 2022 U.S. Dist. LEXIS 232564, at *16 (N.D. Cal. Nov. 7, 2022)
21 (noting that, in *Zucco*, the Ninth Circuit held “‘the fact that a confidential witness reports hearsay
22 does not automatically disqualify his statement from consideration’ and, instead, it simply ‘may
23 indicate that a confidential witnesses’ report is not sufficiently reliable, plausible, or coherent to
24 warrant further consideration’”); *In re Fusion-io, Inc. Sec. Litig.*, No. 13- CV-05368-LHK, 2015
25 U.S. Dist. LEXIS 18304, *62 (N.D. Cal. Feb. 12, 2015) (stating that, “[w]here . . . a confidential
26 witness relies on hearsay, courts accord the account of that witness little weight”).

27 Even if CW-1’s information could be deemed reliable, the information is not sufficient to
28 establish falsity, particularly because it is not clear from the CAC what the timing of the

1 interactions between Maxeon and the dealers was. Did the interactions take place while the non-
2 circumvention provision with SunPower was still in place or after? This is important because,
3 even if it might be “underhanded” for Maxeon to reach out to SunPower dealers directly while the
4 MSA was still binding on it, why would it be underhanded for Maxeon to work with dealers in the
5 future after the MSA was no longer binding? If the non-circumvention provision was no longer in
6 place, then why would it be false for Maxeon to believe that it could aggressively ramp up sales to
7 SunPower dealers in the future since it would then be free of the non-circumvention provision?

8 Moreover, apart from the timing, CW-1’s information is vague in that it is not clear what
9 exactly was meant by “a great deal of loss” of dealers. No information is provided about the
10 number of dealers making negative comments about Maxeon or the significance of the dealers
11 (*i.e.*, whether they “big” potential customers). Such information, assuming it reflected dealer
12 reactions after termination of the non-circumvention provision, informs whether it was reasonable
13 for Maxeon to believe that it could aggressively ramp up sales to SunPower dealers in the future.
14 *Cf. id.* at *66-67 (noting that, “[w]here a plaintiff relies on the accounts of confidential witnesses,
15 the Court must evaluate the witness’ account based on, *inter alia*, ‘the *level of detail* provided by
16 the confidential sources’[;] [h]ere, CW2’s statements [that Fusion salespeople attended meetings
17 where they discussed general topics such as ‘pressure from a competitor’ and the ‘size of the
18 potential sale in jeopardy’] are *too general* to support the implication that [defendants’] statements
19 regarding the buying patterns of [two of Fusion’s prominent customers] were false”) (emphasis
20 added); *see also Kipling v. Flex Ltd.*, No. 18-CV-02706-LHK, 2020 U.S. Dist. LEXIS 232631, at
21 *36-37 (N.D. Cal. Dec. 10, 2020) (noting that plaintiffs had alleged false statements about Flex’s
22 profitability projections, but CWs had only testified about “operational difficulties, not missed
23 profitability projections”; “[p]rofitability projections . . . depended on more than smooth
24 operations,” and plaintiff failed to address “other determinants of the [customer] contract’s
25 profitability for Flex”), *aff’d by Nat'l Elevator Indus. Pension Fund v. Flex Ltd.*, No. 21-15050,
26 2021 U.S. App. LEXIS 37868, at *3 (9th Cir. Dec. 21, 2021) (stating that “the confidential witness
27 statements describe operational difficulties without directly contradicting Flex’s statements about
28 profitability or successes surrounding the Nike project” and thus the level of specificity required

1 by the PSLRA was not met).

2 As for CW-2, CW-2 was a Marketing Manager at Maxeon from August to November
3 2023. “CW-2 was one of two employees who worked on the U.S. marketing team. CW-2 worked
4 with counterparts in Europe who worked for SunPower. CW-2 also attended weekly sales
5 meeting[s] where discussions typically centered around the sales team pipeline.” CAC ¶ 41.
6 According to CW-2,

7 Maxeon employees would still have conversations with customers
8 [“under the rug” despite that the non-circumvention clause was still
9 in effect. Additionally, prior to a trade show that occurred in late
10 September 2023 or early October 2023, CW-2 attended a sales
11 meeting held by a Director of Sales who told the Company’s
employees to get SunPower’s dealers’ credentials and not to get
caught having improper conversations with them. At this meeting,
CW- 2 and that director discussed speaking to SunPower dealers.

12 CAC ¶ 65. Even assuming CW-2 was in a position to possess the information alleged above, the
13 information does not show the alleged falsity – *i.e.*, that Maxeon was already having a hard time
14 making direct sales to SunPower dealers. Nor does CW-2 address whether such difficulties were
15 encountered after termination of the non-circumvention provision.

16 Plaintiff protests that dismissal would be inappropriate because he has alleged
17 corroborating details for the CWs’ testimonies – to wit, SunPower’s allegation that Maxeon had
18 violated the MSA’s non-circumvention provision. *See* CAC ¶ 4 (“Maxeon . . . was prohibited by a
19 non-circumvention clause in its agreements with SunPower from directly selling its solar panels to
20 SunPower’s dealers and installers.”); CAC ¶ 51 (“The New Master Supply Agreement also
21 contained a non-circumvention clause that prevented the parties from dealing with third-parties
22 behind the other’s back in contravention of the obligations under the agreement.”); CAC ¶ 53
23 (“SunPower alleged that Maxeon was in breach of the New Master Supply Agreement’s non-
24 circumvention clause.”). But whether Maxeon had actually violated the non-circumvention
25 provision in the MSA is beside the point; Plaintiff is claiming falsity on the basis that Maxeon’s
26 alleged efforts to sell directly to SunPower’s installers were not successful, not whether it had
27 previously violated the non-circumvention provision.

28 The Court, therefore, dismisses the claims based on Statement No. 1 but with leave to

1 amend.

2 2. Statement No. 2

3 Like Statement No. 1, Statement No. 2 was made during the November 15, 2023, earnings
4 call and relates to Maxeon working with SunPower's installers or dealers. During the call, Mr.
5 Mulligan stated as follows:

6 We have exclusivity on the Maxeon 6 product through the end of
7 Q1, but we are able to sell Maxeon 3 and Maxeon 7 starting the first
8 of the year. **It is a little early to see how that's going. We've**
obviously been very careful not to approach SunPower dealers
while the contract [i.e., the MSA with the non-circumvention
provision] is still in place. And that remains to be the case for a
number of dealers, not all of the dealers but a number of the
dealers through the end of the year.

10
11 CAC ¶ 88 (emphasis added). According to Plaintiff, this was a misrepresentation because it
12 omitted the fact that "Maxeon had tried to do business with SunPower dealers and installers before
13 the non-circumvention clause expired but this had been largely unsuccessful . . ." CAC ¶ 89.

14 Defendants contend that any claim based on Statement No. 2 should be dismissed because,
15 as above, Plaintiff has failed to sufficiently allege that Maxeon tried to do business with SunPower
16 dealers before the expiration of the non-circumvention clause but was unsuccessful. For the
17 reasons stated above, the Court agrees (*e.g.*, CW-1's testimony is not reliable and does not
18 establish that sale efforts post-non-circumvention provision were doomed to fail).

19 Consistent with the above, the Court dismisses the claims based on Statement No. 2 but
20 with leave to amend.

21 3. Statement No. 3

22 Statement No. 3 is one of the statements related to Maxeon's cash flow and liquidity.
23 During the November 15, 2023, earnings call, Mr. Strohbecke stated: "**Cash levels were also**
24 **impacted by** lower shipments and margin dollars from our global DB business, **the reduction of**
25 **contract liabilities related to our US utility scale business capital expenditures during the**
26 **quarter**, restructuring expenses and a reduction in short term debt." CAC ¶ 90 (emphasis in
27 original). The bolded language above appears to relate to the amortization of Utility-Scale
28 prepayments. If contract liabilities were being reduced, that meant Maxeon was, at the same time,

1 recognizing revenue from the prepayments made under the contracts. The latter would have a
 2 positive impact on cash levels.

3 Plaintiff contends that Statement No. 3 was false and misleading because Defendants did
 4 not disclose that

5 (1) [Maxeon] was at or nearing the peak of its prepayment
 6 amortization schedule of its Utility-Scale contracts; (2) . . . as a
 7 result . . . , less cash would be coming in in the near term, which
 risked materially undermining its ability to continue as a going
 concern absent liquidity support; and (3) lenders had expressed
 8 concern about Maxeon’s ability to continue as a going concern by at
 least September 2023 [which was after Maxeon and SunPower had
 9 their falling out but before the start of the class period].

10 CAC ¶ 92 (emphasis added).⁷

11 Defendants argue that any securities fraud claim based on Statement No. 3 should be
 12 dismissed because Plaintiff has failed to adequately allege falsity. The Court agrees.

13 As an initial matter, the Court notes that securities law

14 prohibit[s] *only* misleading and untrue statements, not statements
 15 that are incomplete. . . . Often, a statement will not mislead even if it
 16 is incomplete or does not include all relevant facts. Further, a
 17 completeness rule such as [plaintiffs] suggest could implicate nearly
 18 all public statements potentially affecting securities sales or tender
 19 offers. No matter how detailed and accurate disclosure statements
 are, there are likely to be additional details that could have been
 disclosed but were not. To be actionable under the securities laws,
 an omission must be misleading; in other words it must
 affirmatively create an impression of a state of affairs that differs in
 a material way from the one that actually exists.

20 *Brody v. Transitional Hosps. Corp.*, 280 F.3d 997, 1006 (9th Cir. 2002) (emphasis in original); *see*
 21 *also Zhou v. Desktop Metal, Inc.*, 120 F.4th 278, 294 (1st Cir. 2024) (stating that, “[w]hen making
 22 a voluntary disclosure, a company that reveals one fact is not required to ‘reveal all others that,
 23 too, would be interesting, market-wise’; instead, it is required only to reveal the facts necessary to
 24 make the existing statement *not ‘so incomplete as to mislead’*”) (emphasis added).

25

26 ⁷ *See also* Opp’n at 9 (asserting that Maxeon’s “ cash levels were positively impacted by its utility-
 27 scale contracts only because the Company had not yet realized the pre-paid expenses associated
 28 with these contracts and with the peak of the prepayment amortization schedule looming, the
 Company would soon be forced to recognize “\$55.1 million [in Utility-Scale] contract liabilities,”
 and would receive no further cash from these prepayments”).

1 Here, Plaintiff has not sufficiently explained how Statement No. 3 – which simply notes
 2 that cash levels were impacted, among other things, by a reduction of contract liabilities – ““would
 3 give a reasonable investor the impression of a state of affairs that differs in a material way from
 4 the one that actually exists.”” *In re Cutera Sec. Litig.*, 610 F.3d 1103, 1109 (9th Cir. 2010). There
 5 was, *e.g.*, no suggestion in the statement that there would be continued reductions of contract
 6 liabilities (or continued revenues coming in from prepayments). *Cf. Zhou*, 120 F.4th at 294
 7 (rejecting plaintiff’s contention that CEO’s “statement about ‘adding capacity to meet the robust
 8 demand’ for [dental product] was rendered misleading by failing to disclose that EnvisionTEC
 9 was producing some [product] at the unregistered Montreal facility”; “[t]he challenged statement
 10 is not incomplete or misleading for failing to admit that some Flexcera resin was produced at a
 11 non-compliant facility, because the statement itself leaves no impression about EnvisionTEC’s
 12 regulatory compliance”).

13 Indeed, as Defendants point out, “accurate reporting of *historical* data does not create a
 14 misleading impression of *future* growth.” *In re Verifone Sec. Litig.*, 784 F. Supp. 1471, 1477
 15 (N.D. Cal. 1992) (emphasis added; adding that, “where actual forecasts *are* made[,] liability may
 16 be premised on false or misleading projections under Rule 10b-5”) (emphasis added)⁸; *see also In*
 17 *re Bayer AG Sec. Litig.*, No. 03-cv-1546 (WHP), 2004 U.S. Dist. LEXIS 19593, at *33 (S.D.N.Y.
 18 Sept. 30, 2004) (holding that statements of a “strong sales” record are not actionable “since they
 19 are merely recitations of historical fact and are not alleged to be inaccurate”); *Fisher v. Acuson*
 20 *Corp.*, No. C 93-20477 RMW (EAI), 1995 U.S. Dist. LEXIS 19968, at *26-27 (N.D. Cal. Apr. 26,
 21

22 ⁸ In *Verifone*, the court explained that accurately reported historical information, such as sales and
 23 profit data, is not actionable because it “is rarely subject to misinterpretation, even if the disclosure
 24 is accompanied by generally optimistic statements about the future by corporate officers” given
 25 that investors ‘know how to devalue the optimism of corporate executives, who have a personal
 26 stake in the future success of the company.’ *Verifone*, 784 F. Supp. at 1481. The Second Circuit
 27 made a similar comment in *Boca Raton Firefighters & Police Pension Fund v. Bahash*, 506 Fed.
 28 Appx. 32, 38-39 (2d Cir. 2012) (rejecting plaintiff’s argument that company’s “statements about
 its earnings were actionable, even though literally true, because they did not acknowledge the
 long-term unsustainability of its business model”; “[w]hatever the scope of the responsibility not
 to make statements that constitute ‘half-truths,’ that surely does not apply to the reporting of
 unmanipulated corporate earnings,” and “[t]o the extent that investors might impute a positive
 corporate outlook from omissions in earnings reports, we have explained that general expressions
 of corporate optimism are ‘too indefinite to be actionable under the securities laws’”);

1 1995) (noting “plaintiffs do not allege how admittedly accurate information about the past,
2 although ‘unrepresentative of what was actually occurring currently at the Company,’ in and of
3 itself would mislead an investor into thinking that the trend would continue”). *Accord Kolominsky*
4 *v. Root, Inc.*, 100 F.4th 675, 686 (6th Cir. 2024) (stating that “[t]he disclosure of accurate
5 historical data does not become misleading *even if* less favorable results might be predictable by
6 the company in the future”) (emphasis added); *In re Omega Healthcare Investors Secs. Litig.*, 563
7 F. Supp. 3d 259, 277 (S.D.N.Y. 2021) (noting that “defendants may not be held liable under the
8 securities laws for accurate reports of past successes, *even if* present circumstances are less rosy”)
9 (emphasis added); *Monachelli v. Hortonworks*, 225 F. Supp. 3d 1045, 1055 (N.D. Cal. 2016)
10 (rejecting plaintiff’s claim of falsity, which was based on defendants’ touting of historical
11 financial results “without exposing ‘the downside impacts of that growth on Hortonworks’ strained
12 cash position”; “disclosure[s] of accurate historical data accompanied by general statements of
13 optimism’ and ‘failure to disclose internal forecasts of future performance’ are not actionable”).
14 Compare *In re Splash Tech. Holdings Sec. Litig.*, No. C 99-00109 SBA, 2000 U.S. Dist. LEXIS
15 15369, at *56 (N.D. Cal. Sept. 29, 2000) (noting that, “[a]lthough paragraph 146 also includes
16 statements *involving* historical facts, it conveys the impression of future expansion – a premise
17 challenged by plaintiffs”) (emphasis added).

18 Accordingly, the Court dismisses the claims based on Statement No. 3 but with leave to
19 amend.

20 4. Statement No. 4

21 Statement No. 4 is another statement about Maxeon’s cash flow and liquidity. In the Form
22 6-K filed on November 15, 2023 (providing the company’s quarterly report for 2023 Q3), Maxeon
23 stated:

24 **Liquidity and Capital Resources**

25 ***Current Sources of Liquidity and Capital Resources***

26 As of October 1, 2023, we had unrestricted cash and cash
27 equivalents of \$208.1 million, restricted cash of \$9.2 million and
28 short-term securities representing a 6-months time deposit of \$60.0
million as compared to \$227.4 million of unrestricted cash and cash
equivalents, \$40.5 million of restricted cash and short-term

1 securities representing a 4-month time deposit of \$76.0 million as of
2 January 1, 2023.

3

4 **Anticipated Sources of Funds**

5 **We believe that our current cash, cash equivalents, along with
cash expected to be generated from operations will be sufficient
to meet our obligations over the next 12 months.**

6 CAC ¶ 91 (emphasis in original).

7 According to Plaintiff, Statement No. 4 was false because Defendants did not disclose that:

8 (1) [Maxeon] was at or nearing the peak of its prepayment
9 amortization schedule of its Utility-Scale contracts; (2) . . . as a
10 result . . . , less cash would be coming in in the near term, which
11 risked materially undermining its ability to continue as a going
concern absent liquidity support; and (3) lenders had expressed
concern about Maxeon's ability to continue as a going concern by at
least September 2023 [which was after Maxeon and SunPower had
their falling out but before the start of the class period].

12 CAC ¶ 92.

13 Defendants argue that any claim based on Statement No. 4 should be dismissed for three
14 reasons: (1) the statement was a forward-looking statement protected by the safe harbor provision
15 in the PSLRA; (2) the statement is a nonactionable opinion statement; and (3) there are
16 insufficient allegations that the statement was false or misleading. Similar to above, the Court
17 focuses on the third argument.

18 As an initial matter, the Court distinguishes between Plaintiff's claim that Statement No. 4
19 was false or misleading because (a) there was no disclosure that less cash would be coming in
20 because of the amortized Utility-Scale contracts and (b) there was no disclosure that lenders had
21 expressed concern about whether Maxeon could continue as a going concern.

22 With respect to (a), the mere fact of that Maxeon was at or near the peak of its prepayment
23 amortization schedule did not thereby mean that Maxeon could not continue operations for the
24 next 12 months – at least Plaintiff has failed to explain why. There is no allegation indicating,
25 e.g., that the amortization of the Utility-Scale contracts was of such significance that it alone could
26 dictate whether or not Maxeon would continue as a going concern.

27 As for (b), the question is whether Statement No. 4 ("We believe that our current cash,

1 cash equivalents, along with cash expected to be generated from operations will be sufficient to
2 meet our obligations over the next 12 months") – which was made in November 2023 – is
3 problematic given that there was no disclosure that lenders had already expressed concern about
4 whether Maxeon could continue as a going concern by at least September 2023. Plaintiff relies in
5 large part on the testimony of CW-1:

6 [A]ccording to CW-1, a member of Maxeon's Treasury Team, the
7 Company's cash and liquidity position had been deteriorating since
8 May or June of 2023 and became "dire" in March 2024. Indeed,
9 CW-1 further provided that concern from lenders about Maxeon's
ability to continue as a going concern came as early as summer 2023
and no later than September 2023. And "a lot" of the available
financing options that Maxeon did have were presented to
Strohbecke and Mulligan.

10
11 CAC ¶ 71; *see also* CAC ¶ 112 (alleging that "CW-1 described that CW-1 and Strohbecke were
12 very involved in discussing issues, such as financing from lenders and from these conversations 'a
13 lot of options were presented to [Strohbecke and Mulligan]"') (emphasis omitted).

14 Defendants' main criticism here is that the information provided by CW-1 is too
15 generalized in nature. For example, Defendants contend that, although Plaintiff alleges "Maxeon
16 executives discussed financing and were presented with options[,] . . . [m]issing is any allegation
17 regarding the liquidity analysis performed . . ." Mot. at 18; *see also* Reply at 6 (arguing that
18 there must be "particularized facts that contradict the challenged statements, not vague
19 'considerations' and 'concerns' expressed months earlier").

20 Defendants' position is not entirely convincing. Defendants have not explained why
21 Plaintiff would have to plead details about the lenders' analyses so long as the lenders'
22 conclusions and general basis therefor were clear. Defendants argue that one of the cases cited by
23 Plaintiff contains more detail about why a statement similar to Statement No. 4 was found to be
24 sufficiently false or misleading:

25 On June 26, 2002, Vivendi [the defendant-company] issued a press
26 release stating that "[o]wing to its strong free cash flow, combined
27 with the execution of the disposals program and potential bond
issues, [Vivendi] is confident of its capacity to meet its anticipated
28 obligations over the next 12 months." Special App'x 330 (Statement
56). [But] [t]wo days earlier, on June 24, 2002, Goldman Sachs, in
response to a request by Vivendi's board to analyze Vivendi's

1 liquidity situation, explained to Vivendi's board that one of four
2 possible scenarios is that Vivendi would have to file for bankruptcy
3 protection as early as September. Soon thereafter, Edgar Bronfman,
4 Jr., whose family was one of Vivendi's largest shareholders at the
5 time, wrote that Vivendi's situation was a "matter of the gravest
concern" and that Vivendi "must install . . . new management right
away to take charge of convincing the banks to extend some credit
while we sell some of our assets to avoid bankruptcy. We have no
time. Our board must act tomorrow without fail. Our company may
fail, and we have not one minute more to waste." Trial Tr. 7361.

6 *In re Vivendi, S.A. Sec. Litig.*, 838 F.3d 223, 252 (2d Cir. 2016). While Defendants are correct
7 that there were more details described in *Vivendi*, that case went through a jury trial. This case is
8 only at the 12(b)(6) phase.

9 Nonetheless, the problem for Plaintiff is that his allegations about the lenders' conclusions
10 are still too vague and conclusory. As alleged, lenders expressed concern about whether Maxeon
11 could continue as a going concern but, without more information about the *basis* for that concern,
12 it is not clear whether Statement No. 4, which said Maxeon was expected to continue for another
13 12 months, was false or misleading.

14 For the foregoing reasons, the Court dismisses the claims based on Statement No. 4, but as
15 above with leave to amend.

16 5. Statement No. 5

17 On April 8, 2024, Maxeon issued a press release announcing its preliminary financial
18 results for FY 2023 and 2024 Q1. *See* CAC ¶ 93. The press release included the following
19 statements from Mr. Mulligan:

20 • "In the fourth quarter, **Maxeon delivered financial results largely in line with**
21 **our expectations.** Our U.S. utility-scale business accounted for the majority of
22 revenues in the fourth quarter, with stable ASPs." CAC ¶ 93 (emphasis in
23 original).

24 According to Plaintiffs, Statement No. 5 was false and misleading because Defendants did
25 not disclose that

26 (1) [Maxeon] was in the peak of its prepayment amortization
27 schedule of its Utility-Scale contracts; (2) [Maxeon] was informed
28 by two of its large Utility-Scale customers in early Q1 2024 that
they were experiencing project delays and would be unable to accept
its deliveries under the contract, causing the Company to absorb the

1 costs of unused inventory; (3) . . . as a result . . . , Maxeon's cash
 2 position had significantly deteriorated, giving rise to a cash flow and
 3 liquidity crisis that would inhibit the Company's ability to continue
 4 as a going concern absent liquidity support; and (4) lenders had
 5 expressed concern about Maxeon's ability to continue as a going
 6 concern by at least September 2023.
 7 CAC ¶ 95; *see also* CAC ¶ 73 (alleging that "Maxeon suffered a net loss of over \$275 million in
 8 2023, amounting to a total cash flow of negative \$254.3 million by the end of that fiscal year, and
 9 then suffered an additional \$80.1 million loss, in the first three months of 2024").

10 Defendants contend that any securities claim based on Statement No. 5 should be
 11 dismissed because (1) the statement was simply one of corporate optimism; (2) the statement is a
 12 nonactionable statement of opinion; and (3) Plaintiff has failed to adequately allege that the
 13 statement was false. As a practical matter, the Court can simply focus on the third argument. The
 14 Court agrees with Defendants that there is an insufficient showing that Statement No. 5 was false.
 15 First, the statement is tantamount to a reporting of historical data, and no representations were
 16 made about future growth. Second, even if there were problems related to two large Utility-Scale
 17 customers for 2024 Q1, Statement No. 5 was about 2023 Q4; thus, a failure to reference the
 18 problems in 2024 Q1 cannot be said to be false or misleading.⁹ Finally, as discussed above, the

19 ⁹ At the hearing, Plaintiff suggested that Defendants knew about the problems with the two
 20 Utility-Scale customers as of 2023 Q3. But the CAC expressly states that "[Maxeon] was
 21 informed by two of its large Utility-Scale customers *in early Q1 2024* that they were experiencing
 22 project delays and would be unable to accept its deliveries under the contract, causing the
 23 Company to absorb the costs of unused inventory." CAC ¶ 95 (emphasis added).

24 To the extent Plaintiff is now relying on the May 30, 2024, earnings call in support, the
 25 language used during the call is somewhat ambiguous on timing:

26 "Since the middle of last year, Maxeon has been under significant
 27 pressure due to the unprecedented market dislocation caused by
 28 worldwide Chinese module oversupply, high interest rates and
 policy changes. Maxeon also suffered from the termination of our
 SunPower supply agreement and delivery pushouts by 2 of our
 primary utility-scale customers."

29 CAC ¶ 100. It is not clear from this statement whether the pushouts also took place in 2023 Q3.
 30 *See also* Anders Decl., Ex. 9 (financial results for 2024 Q1) (ECF Pages 355-56) ("[S]ince the
 31 middle of 2023, the worldwide solar industry has suffered and continues to suffer from oversupply
 32 and intense competition, as well as lower demand in our key markets driven by regulatory changes
 33 and a higher global interest-rate environment. All these factors have contributed to a steep fall in
 34 average selling prices that has negatively impacted our revenue, profitability and cash flows.
 35 Furthermore, several large customers in the United States have cancelled or deferred their off-take
 36 commitments, further contributing to the deterioration of the Company's financial condition.").

1 allegations made about the lenders is vague and, without more information, cannot show that
2 Statement No. 5 was false or misleading.

3 6. Statement No. 6

4 Statement No. 6 is another statement made in Maxeon's press release issued on April 8,
5 2024. To wit:

6 • “The Maxeon team is highly focused on reducing manufacturing costs, OPEX
7 rationalization and **liquidity-management to enable a return to profitability**.
8 Our strategy continues to be to focus on designing and building premium,
9 differentiated products and delivering a superior customer experience across a
10 balanced portfolio of global DG **and U.S. utility-scale markets**. The Company
11 plans to file its annual 20-F report by April 30, 2024.” CAC ¶ 93 (emphasis in
12 original).

13 According to Plaintiffs, Statement No. 6 was false and misleading because Defendants did
14 not disclose that

15 (1) [Maxeon] was in the peak of its prepayment amortization
16 schedule of its Utility-Scale contracts; (2) [Maxeon] was informed
17 by two of its large Utility-Scale customers in early Q1 2024 that
18 they were experiencing project delays and would be unable to accept
19 its deliveries under the contract, causing the Company to absorb the
20 costs of unused inventory; (3) . . . as a result . . . , Maxeon’s cash
position had significantly deteriorated, giving rise to a cash flow and
liquidity crisis that would inhibit the Company’s ability to continue
as a going concern absent liquidity support; and (4) lenders had
expressed concern about Maxeon’s ability to continue as a going
concern by at least September 2023.

21 CAC ¶ 95; *see also* CAC ¶ 73 (alleging that “Maxeon suffered a net loss of over \$275 million in
22 2023, amounting to a total cash flow of negative \$254.3 million by the end of that fiscal year, and
23 then suffered an additional \$80.1 million loss, in the first three months of 2024”).

24 For Statement No. 6, Defendants make two arguments: (1) the statement was forward
25 looking and thus is protected by the PSLRA’s safe harbor; and (2) Plaintiff has not sufficiently

26
27
28 In any event, even if the pushouts did take place during 2023 Q3, Statement No. 5 is still a
reporting of accurate historical data.

1 alleged that the statement is false. Here, the Court focuses on the second argument. Plaintiff has
2 failed to explain how it was false for Defendants to say that the company's plan was to focus on
3 liquidity management and the Utility-Scale market. That there were problems with two Utility-
4 Scale customers does not mean that it was misleading for Defendants to indicate, *e.g.*, that they
5 wanted to build up the Utility-Scale market. There was nothing that "affirmatively create[d] an
6 impression of a state of affairs that differ[ed] in a material way from the one that actually
7 exist[ed]." *Brody*, 280 F.3d at 1006.

8 7. Statement No. 7

9 Finally, on April 30, 2024, Maxeon filed with the SEC a Form NT 20-F, which was signed
10 by Mr. Strohbecke. In the form, Maxeon stated that it would not be able to timely file its 2023
11 annual report. It also stated as follows:

12 Factors which have affected the timing of the preparation and
13 review of the financial statements include the additional **ongoing**
14 **work required in connection with the assessment of the**
15 **Company's ability to continue as a going concern**, including the
16 **ongoing analysis of the Company's strategic options** with the
17 assistance of external advisors.

18 CAC ¶ 94 (emphasis in original).

19 Again, according to Plaintiff, Statement No. 7 was false and misleading for the same
20 reasons Statements Nos. 5 and 6 are false and misleading – *i.e.*, there was a failure to disclose that

21 (1) [Maxeon] was in the peak of its prepayment amortization
22 schedule of its Utility-Scale contracts; (2) [Maxeon] was informed
23 by two of its large Utility-Scale customers in early Q1 2024 that
24 they were experiencing project delays and would be unable to accept
its deliveries under the contract, causing the Company to absorb the
costs of unused inventory; (3) . . . as a result . . . , Maxeon's cash
position had significantly deteriorated, giving rise to a cash flow and
liquidity crisis that would inhibit the Company's ability to continue
as a going concern absent liquidity support; and (4) lenders had
expressed concern about Maxeon's ability to continue as a going
concern by at least September 2023.

25 CAC ¶ 95. In essence, Plaintiff maintains that, at the time Statement No. 7 was made,
26 "Defendants *already* knew . . . that Maxeon would be unable to continue as a going concern absent
27 significant liquidity support." Opp'n at 12 (emphasis added).

28 Plaintiff's position is not entirely lacking in merit. It is somewhat suspect that, just a

1 month after the above statement, Maxeon made the disclosure that it had such a serious cash flow
2 problem that it had “negotiated commitments for significant liquidity support from [its] largest
3 shareholder TZE” through a dilutive offering,” CAC ¶ 80 – this in spite of the fact that the “TZE
4 takeover” would result in “share dilution” and further “complicate the Company’s operational
5 prospects” because, as explained in an analyst report, “[w]ith a majority of the company now
6 owned by a Chinese entity, the new [capital] raise calls into question [Maxeon’s] ability to secure
7 the DOE loan for its New Mexico [manufacturing] facility.” CAC ¶ 82. On the other hand, it is
8 not clear that Statement No. 7 was false or misleading because part of the company’s evaluation of
9 whether it could continue as a going concern was likely dependent on whether it could get
10 liquidity support from a third party (such as TZE). At bottom, without additional allegations by
11 Plaintiff, it cannot plausibly be said Defendants knew in April 2024 that it could not continue as a
12 going concern.

13 The Court therefore dismisses the claims based on Statement No. 7 but with leave to
14 amend.

1 **III. CONCLUSION**

2 As discussed above, the claims based on all seven statements identified by Plaintiff are
3 dismissed, but with leave to amend. Dismissal is based on failure to sufficiently plead falsity.
4 The Court does not address Defendants' arguments that Plaintiff has also failed to allege scienter.
5 Whether or not there are sufficient allegations to support scienter may turn on what Plaintiff
6 pleads with respect to falsity.

7 Plaintiff may file an amended complaint within four weeks of the date of this order. If no
8 amended complaint is filed, then the dismissal shall be deemed with prejudice at that point and the
9 case will be closed. If an amended complaint is filed, Defendants shall have four weeks thereafter
10 to file a response, whether an answer or a motion to dismiss.

11 This order disposes of Docket No. 70.

12 **IT IS SO ORDERED.**
